

Packaging Industry

THERMORUNNER KTR 4 Speed

The KTR 4 Speed is the ideal cup-forming line for small and midsize output requirements and maximum quality.

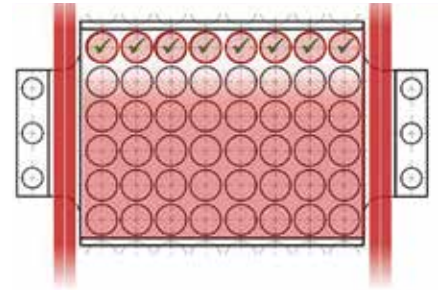

The machine is used for the manufacture of cups and a wide range of similar products made of PS, PP, PE, PVC, PET, PLA and others. It offers high speed combined with inexpensive tool costs.

Automatic Pressure Forming Machine
KTR 4 Speed

Advanced heater settings

Kein Problem im Randbereich

Optimal für dünnwandige Becher

- Highest efficiency regarding energy consumption and material utilization
- Table movement realized by camshaft and only one strong servomotor
- Efficient cooling system with high water flow rate and perfect water temperature of 16–18 °C
- Integrated pre-heating for comfortable film handling and less energy consumption
- Advanced heater settings and closed loop temperature control

Turn-key solutions for your products

Thermoforming machine, tooling and automation for downstream out of one hand

PUS Pick-up Stacker Semi-Automatic

Technical Data	KTR 4 Speed
Maximum forming area	535 x 380 mm
Minimum forming area	275 x 80 mm
Maximum tool dimensions	780 x 400 mm
Maximum tool weight (block)	550 kg
Maximum height of formed part	115 mm/150 mm
Maximum film width	560 mm
Maximum production speed	45 cycles/min.
