KMD 52 / 75: Forming / Punching Station*

DESCRIPTION:

In the forming station the previously heated foil is formed to the moulded parts. The punching station is used to pre-punch the moulded parts or punch holes in the ground.

YOUR ADVANTAGES:

- ▶ **Latest generation** of forming stations
- ▶ **Reinforced cast parts** due to additional reinforcing ribs
- ▶ **Enhanced strength** on the eccentric
- ▶ **New motor technology**
- ▶ **New sensor technology** on the yoke adjustment
- ▶ **Increased punching power** on BFS-station

* The retrofitting of the forming station to the actual series-production status can be performed in most KIEFEL-machines of series KMD 52 and KMD 75.

We would be pleased to make a quotation according to your machine.
To provide best assistance please mention your machine type and ID-number.
