KMD 52 / 75

Pneumatical mould release support*

DESCRIPTION:

Using this upgrade, an additional pneumatic-moved bottom in the forming tool can be controlled. An additional valve is improving the outcome of the demoulding process as the moulding parts are not deformed by the mould-release air.

The conversion kit contains an additional valve including necessary pipes to the forming table as well as necessary software updates.

YOUR ADVANTAGES:

- ▶ Improvement of product results
- ▶ Cost savings

* The pneumatical mould release support can be retrofitted in most KIEFEL KMD 52 and KMD 75 machines.

We would be pleased to make a quotation according to your machine.
To provide best assistance please mention your machine type and ID-number.
