Switching off pyrometer cooling*

DESCRIPTION:

After switching off the heating the pyrometer cooling is also turned off automatically after expiration of a previously set time period. This function is working even when the whole machine is switched off.

YOUR ADVANTAGES:

- ▶ Extension of the pyrometer lifetime
- ▶ Reducing demand of compressed air due to time limited cooling

* The switching off of pyrometer cooling can be retrofitted in most KIEFEL KMD 52 and KMD 75 machines

We would be pleased to make a quotation according to your machine.
To provide best assistance please mention your machine type and ID-number.
