KMD 52 / 75

Torque Inversion Ejector*

DESCRIPTION:

Older KMD machines were not equipped with a torque inversion for the ejector. The ejector will move back into regular position when reaching the set torque limit without stopping the machine.

YOUR ADVANTAGES:

- ▶ Saving time (due to incorrect punching)
- ▶ User friendly

* The torque reverse ejector can be retrofitted in most KIEFEL KMD52 and KMD 75 machines

We would be pleased to make a quotation according to your machine.
To provide best assistance please mention your machine type and ID-number.
