KMD 52 / 75

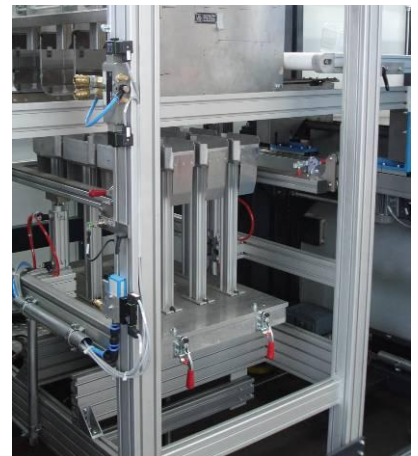

Additional Vacuum Stacking Station*

DESCRIPTION:

Using an additional valve, moulding parts can be adhered by a vacuum at the mounting while being stacked. When reaching the top position the moulding parts will be blown off the mounting.

The retrofit kit includes an additional valve, pipes to the stacking frame as well as a necessary software update.

YOUR ADVANTAGES:

- ▶ Adjustable operating time for vacuum time and blow off function
- ▶ Stacking of complex parts is made considerably easier

* The additional vacuum stacking station can be retrofitted in most KIEFEL KMD52 and KMD 75 machines

We would be pleased to make a quotation according to your machine.
To provide best assistance please mention your machine type and ID-number.
