

Packaging Industry

SPEEDFORMER KMD 90 Premium

The KMD 90 Premium is designed for special customer's needs and equally an universal genius.

The machine is used for the manufacture of packaging products made of (R)PET, PP, PS, CPET, OPS, PLA, PE and others.

Raise yourself into a new dimension!

Automatic Pressure
Forming Machine
KMD 90 Premium

Tool-changing station for quick tool-change in one block

Pick & Place to opposite operator side, convenient height of reception

Slug-removal station (e.g. Euro-holes)

- Upper and lower heating banks with efficient black ceramic heating elements and closed loop temperature control available
- Forming station with independent servo-plug drive on upper and/or lower table
- No compromise on Kiefel „KISS CUT“ by use of tension bars in cutting station
- Stacking station design as up-stacker or down-stacker, with tip-stacker or Pick & Place available
- Tooling from series Sencorp 2500 can be adapted easily

Reliable stacking, high availability of the machine
