

## UPGRADES & RETROFITS

# Schedulable Servomotor modification

Safe your production!

The servomotors in your machines are obsolete.

If spare parts are necessary, the components will no longer be available.

DY motors are no longer being manufactured.

If they need to be replaced, weeks of downtime are to be expected.

A minimum delivery time of 5 weeks is to be expected for upgrading to the current SEW servomotors.

Therefore, we recommend you this plannable modification of your machine.

The KIEFEL modification is based on available CMPZ generation motors.
