

## UPGRADES & RETROFITS

### Motor-driven height adjustment

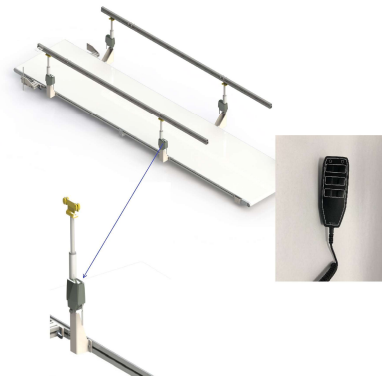

Change positions quickly!

Manual height adjustment of the conveyor belt is very time-consuming and cumbersome!

Our convenient, motorized solution saves you time!

The setting can easily be made using a manual controller directly at the outfeed transport.

In addition, if necessary, the conveyor belt can easily be tilted.

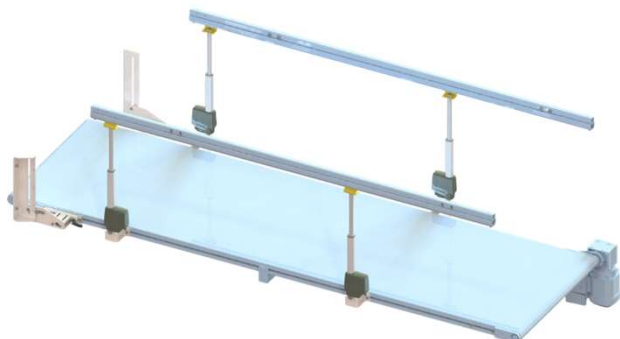

### We have the solution!

## Motor-driven height adjustment

## Requirements

- In order to carry out the installation yourself, you need mechanical and electrical specialists

## Scope of delivery

Linear motors including control unit, brackets, electrical diagram, operating and assembly instructions.

## Your benefits

Significant time savings for frequent product changes

Adjustment in pairs allows the conveyor belt to be inclined

Safe and convenient operation via a separate control unit

Simplified height adjustment of the conveyor belt, makes the workplace more ergonomic

## This is how quickly you can get your new solution!

Supply your machine ID to your contact person.

Installation can be carried out by your own maintenance technician.

Of course, installation by a KIEFEL service technician is also available.

The machine is ready for operation immediately after installation of the height adjustment.
