

NATURE REFORMER KFL 90.1

High-end fiber lids & portion cups production

- Best productivity per square meter with minimal footprint
- Integrated undercut forming and hot-pressing in one station only
- Lowest energy consumption due to Kiefel Steam Flow technology and pre-pressing station
- Separation of forming and trimming allows maximised product output
- Standalone system with one operator per system

Technical data

Maximum forming area

without Die Cut
900 x 700 mm

Maximum height of formed product

40 mm

Pressing force

450 kN

Production speed

20 punching cycles / minute

Footprint

15 x 9 m
