

# INLINE LEAK TESTING MODULE

## Leak free medical and pharmaceutical bags

- Automated solution for the quality control of empty blood bags, plasma bags, IV-bags, nutrition, pharmaceutical or dialysis bags
- 100% - every bag testes
- Automatic and individual discard of failed bags
- Leak detection rate can be set to customer requirements
- Output of inline bag making machines can be matched
- Module ready to attach to new or existing equipment

### Process of the Kiefel leak tester

- Differential pressure - comparison between the tested bag and a reference volume
- Leakage sizes: down to 0,7 SCCM

(Standard Cubic Centimeter / Minute)
